# QUICK START GUIDE

DESIGN YOUR DUKE CONTEST

**KTM**

QUICK START GUIDE

# STEP 1

## START USING VECTARY 3D STUDIO

- Click on the icon on the top left corner to open the menu. 

**Note:** You can choose between two motorcycle colors: orange and black. You can do the same with the background color.

- To start click the **“CHANGE BIKE DESIGN”** button and download the design template (it is a “.png” file) by clicking on the button **“DOWNLOAD TEMPLATE”**.

QUICK START GUIDE

## STEP 2

### CREATE YOUR DESIGN

- To edit the design template, we recommend using graphic editing software like Adobe Illustrator, Adobe Photoshop, or free alternatives like [www.photopea.com](http://www.photopea.com).
- Import the .png template to your graphic editing software and start creating your individual design.

**Note:** Focus on the white areas, since only these will be visible later on the 3D model. Don't mind overlaps of your graphic elements and the black and white areas. This doesn't affect the 3D model.

#### QUICK START GUIDE

## STEP 3

### MAKE YOUR DESIGN COME TO LIFE

- When you are finished creating your design, simply export it as a .png file.

**Note:** You don't need to adjust the color profile, dimensions, etc.

- Go back to our landing page (<https://www.ktm.com/en-int/ktm-world/design-your-duke-contest.html>) and open the VECTARY 3D STUDIO menu. Click on the “**CHANGE BIKE DESIGN**” button and upload your design by clicking on the button “**UPLOAD YOUR DESIGN**”.
- Finally: Preview your design on the 3D KTM DUKE model by clicking on “**PREVIEW YOUR DESIGN**”.

**Note:** The rendering may take up to 5 seconds. Rotate the camera with your mouse (desktop) or fingers (on a mobile phone) to see your design on the 3D model from different angles.

QUICK START GUIDE

## STEP 4

### ENTER THE CONTEST

- When you're happy with the result, open the menu and click on **"TAKE A SCREENSHOT"** to download an image of your current view.

**Note:** We recommend taking at least 5-10 screenshots from different angles to enter the contest.

- To enter the contest, post your KTM DUKE design screenshots on Instagram using the hashtag **#DESIGNYOURDUKECONTEST**. Also let us know what got you inspired and what **READY TO RACE** means for you.

**Note:** You can also share "your 3D model" with a link in the post caption of your entry by again opening the menu, click on **"CHANGE BIKE DESIGN"** and then **"COPY DESIGN LINK"**. Share this link also to preview your design on different devices or with your friends.

## STEP 5

### DUKENESS IN YOUR LIVING ROOM

The cherry on top of the cake! Open the 3D VECTARY STUDIO menu and click on the “**VIEW IN AR**” button to open the AR viewer on your phone (accessible on most Android, iOS, and iPad mobile devices).

Place it in your living room, garage, parking spot or anywhere it'll just look right.

**Note:** This is not a mandatory step to enter the contest but you should definitely try it.
